752	*0	GREAT BRITAIN Classic philately emphasized the study of minute varieties on classic stamps and the early stamps of Great Britain are among the most specialized in the world. Nearly every one of the thousands of stamps in this wonderful 83 volume (!) collection (in five large cartons) is identified by the Stanley Gibbons Victoria specialized catalog number, along with identifying characteristics (the vast majority of the stamps are different Gibbons varieties, not just quantities of the same stamp). The quality is excellent and the collector spent thousands of hours researching, mounting and neatly annotating this collection (and he spent over \$100,000 on it as well). Neatly cataloged by the 2006-2008 Gibbons catalog, the collection has a Gibbons value L585,000= \$790,000). We flat scanned one volume just as a taste of what you get (remember the collection is 83 volumes). One of the nicest, specialized Great Britain collections in existence offered completely intact, at a very attractive price. This is a specialist's collection. The collector spent a loving lifetime on his stamps selecting thousands of stamps from Penny Reds to early twentieth century highly specialized by Gibbons plate numbers, shades, "Black Plates" on Penny Reds and all sorts of more arcane GB items. Included are some stamps that catalog up to \$2500 each but expect the real value of the collection to be a student's rendering of what highly specialized nineteenth and early twentieth century GB philately can look like. Everything is neatly annotated and mounted and can be easily broken down by volume (SG catalog value over 590,000 pounds= \$800,000)	SB	60,000.00

1601	*	GERMANY - Between 1921 and 1924, Germany was required to pay to Great Britain and France reparations as a result of defeat in World War I. As a result, the value of the Deutsche Mark depreciated tremendously. Originally meant as a device to decrease the real cost of these reparations, currency inflation soon got so out of hand that this period of German history has become a paradigm for fiscal irresponsibility. The Mark went in value from four Marks to the U.S. Dollar in 1914 to 4.25 trillion(!) Marks in 1924. 2013 SP	PARAGUAY - SPECIMEN 'MUESTRA' COLLECTION Very impressive, visually attractive, and highly comprehensive collection of over 1,000 different Paraguayan specimen issues mostly covering the period from 1970 to 2000. These Muestra overprinted issues are very scarce in many cases and deservedly have a status of modern rarities, especially since many are presented in form of pairs, blocks, and strips. It would surely appeal to modern collectors looking to elevate their collection beyond the regular Scott listings, VERY FINE, og, NH	SB	4,000.00		POLAND - An immense mostly mint stock accumulation of close to half a million stamps organized in catalog order housed in 13 large cartons. The catalog value of the lot would be well in excess of \$200,000 as the selection includes many premium issues form an earlier period like dozens of the never hinged souvenir sheets commemorating the visit of King Karol to Poland in 1937, each set has a catalog value of \$120! While the lot includes good number of issues from the first half of the 20th century, by far the bulk of the volume of the lot is made up from the issues from between 1970s and 90s duplicated in stock quantities. The lot is primarily and nearly virtually all mint as just the mint portion of the lot would come to over \$170,000 and a such would most appeal to dealers looking for resale potential, especially since roughly 7,000 miniature/souvenir sheets are still packed in post office packets of 100 as issued. All the issues are neatly grouped together and arranged in Scott catalog order, which would facilitate multiple comprehensive collections of modern period Polish philately.	SB	40,000.00

This is a massive accumulation with cores of regular issues nicely accompanied by Airmail sets including #836-843 (imperf, 50), 828-835 (50), C310-C312 (50) and many others. Besides regular issues the lot includes a lot of footnoted imperforated varieties like #763 (imperf sheets 40), and many others. In total the lot adds up to just under \$130,000 in catalog value! The duplication levels varying from a dozen of stamps to dozens of complete sheets like for instance in the case of Royalty Issues of 1986 and numerous subsequent sets celebrating the Polish nobility. Great number of issues are still in original wrapping as issued by the Polish post office in packets of 100 sealed, never opened. The lot could be broken down into hundreds of individual lots presenting modern Polish philately in a comprehensive manner as scores of stamps are included with se-tenant labels, usually only footnoted in Scott catalog. The lot is largely topical as for example it includes cards and covers celebrating the legacy of Nicolaus Copernicus on Polish covers as well as US and other countries. Besides thousands of articles related to Mikolaj Kopernik, the lot includes many covers dedicated to Scouts, ships, variety of Polish cities and memorable events in Polish history. While postcards are somewhat dominating, the lot also includes in excess of maxi first day covers from the 21st century. This is an exhaustive lot with a myriad of subdivisions including several hundred used year sets from the second half of the 20th century covering Poland and even some neighboring countries like DDR or Czechoslovakia. Total estimated catalogue value of the lot would be in a region of \$30,000 combining postcards and year sets. This massive lot is housed in 8 large cartons. One of the distinctive subsections of the lot would be an accumulation of roughly 5,500 first day covers from the late 1950s going all the way to 2008, high percentage of sets are presented on multiple covers. Overall number of postal cards is twice as high with over 11,000 including great number of touristy and commemorative cards along with traditional postal reply cards. All of the postal cards and first day covers are very neatly organized in chronological order, grouped by year of issues, with all the duplicates grouped by year of issue or occasion. The only exception would be the personal correspondence, which includes some foreign letters, but generally in some way related to the general theme of Poland. Duplication is in many cases relatively high, and the lot would be most appealing to dealers looking to break it down into smaller lots. While the duplication is generally high, in many cases, and especially so in the case of first day covers, the duplication is rather uniform and thus accommodating to forming multiple comprehensive collections covering the second half of the 20th century. This is a massive lot contained in six large cartons (nearly two cartons are taken up by covers, postcards etc.) and should appeal to dealers looking for breakdown value as duplication is generally high throughout. The duplication levels are progressive as the time goes on changing from 4-6 to 20-30 in the 1980s. An attractive feature of the lot is very meticulous inclusion of such philatelic curiosities like regular first day cover followed by the same cover with an airmail sticker 'Par Avion' on it as in many instance the Fischer catalog points out the difference between regular and airmail covers. The lot essentially represents high quality international selection on a variety of different album pages with very limited duplication that was acquired over the lifetime and never made it into an organized set of albums. Previous collector was a keen buyer, number of pages still have purchase slip from an auction house or Ebay, pursuing a variety of different topics whether it's British colonial sets from the early 20th century or Cold War period Romania. This lot would most surely require an effort to organize and shape it into a comprehensive worldwide collection that it is ought to be, but realistically these eight cartons hold everything required to do so. The collection includes a variety of different premium subgroups most notably mint premium sets from British Commonwealth from 1930s and 40s with beautiful sets from British Africa, British India, including a myriad of states, an appealing selection of Middle Eastern sets from the same period, 19th century Europe (expansive section of Scandinavia including some very early premium standouts) and so much more ready and waiting to be taken off the pages they are at the moment and contribute to forming a truly high grade collection, as overall catalog value would surely be astronomical. As as duplication goes it is very low, namely due to the nature of how the stamps are presented - mostly on a variety of album pages rather than stockpages. There is an astonishing number of \$100 and up mint sets, and we've removed nothing for individual sale. So many collectors have asked for collections on the Scott specialty pages to 1940 so that they could begin a collection of 1840-1940 worldwide philately-that is the first century of stamps, and here it is!
